

Corinex

LCD Internet USB Phone

The Corinex LCD Internet USB Phone, allows users all over the globe to make calls over the Internet to anywhere else in the world! Internet telephony, the underlying technology of the USB Phone, can result in substantial savings on telephone calls, often long distance calls can be placed for free! The Corinex LCD Internet USB Phone, a Windows based PC, a broadband Internet connection (Cable or DSL) and an account with a Voice over IP (VoIP) service provider is all that is needed to make low-cost or totally free Internet calls. The Corinex LCD Internet USB Phone package consists of a handset and SoftPhone software that supports the SIP and H.323 version 4 protocols. The handset connects to the USB port on your computer and operates like a standard telephone. The SoftPhone performs the digital encoding of the audio signals and the call control functions.

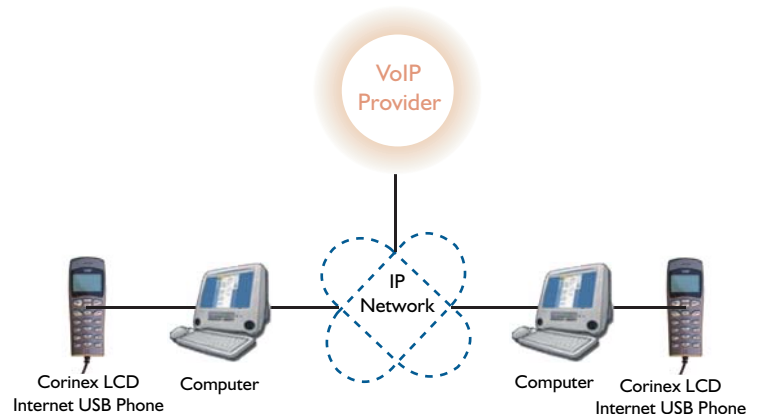

Installation of the Corinex LCD Internet USB Phone is easy, just plug the phone into a PC USB port, there is no need for any drivers. The Corinex LCD Internet USB Phone features a large 1.5" LCD display, keypad dialing and customizable ring tones with WAV files. On the LCD display you can see information such as the date and the name/number that you are calling. The phone has a built-in call-log that can store last numbers called and received. This phone is fully compatible with NetMeeting,

Hicall and other PC-based Softphone applications as well as API software. Simply plug the USB phone into a USB port, configure the software as per the easy to use quick start manual, connect to the Internet and begin talking immediately - save money on long distance calls! The Softphone software is compatible with Windows 98SE/2000/XP/ME and allows connections with every VoIP service provider supporting the SIP or H.323 version 4 protocols. The Corinex LCD Internet USB Phone handset has a streamlined and fashionable design similar to a mobile phone.

Corinex also provides the necessary equipment, based on Powerline technology, to use VoIP services in every room of your home or office. The USB Phone connects to any of your computers by Powerline technology over your existing electrical wiring, coaxial TV cables, or phone lines!

What You Need to Get Started
