

Corinex VoIP USB Phone

on the installation CD, is compatible with Windows 98SE/2000/XP/ME and allows the connection with every VoIP service provider supporting the SIP protocol. The Corinex VoIP phone comes in a streamlined and fashionable design similar to a mobile phone with a built-in wall-mount desktop accessory. The Corinex VoIP USB phone will save you long distance and international calls costs while making calls from PC to PC for free over the Internet.

Corinex also provides the necessary equipment with Powerline technology to use VoIP service in every room, simply by having your USB Phone connected to your computer which is plugged into an electrical outlet and being connected instantly. You can further extend the VoIP service and functionality anywhere in your home or office with Corinex Powerline and CableLAN products family, consisting of:

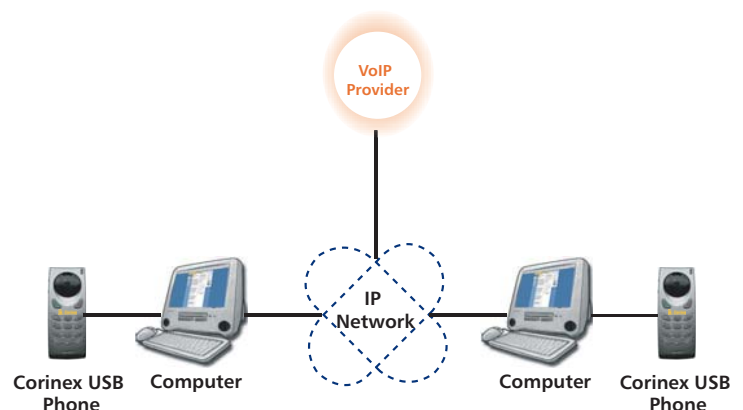

- Corinex Powerline Ethernet Adapter
- Corinex Powerline USB Adapter
- Corinex Powerline Ethernet Wall Mount
- Corinex Powerline Router
- Corinex Wireless to Powerline Access Point 802.11b
- Corinex Powerline USB Wall Mount
- Corinex Wireless to Powerline Access Point 802.11g

The Internet continues to change the way we live and communicate. The next paradigm shift following the convergence of broadband and data services will be telephone services. Recent developments and enhancements to VoIP (Voice over Internet Protocol) will fundamentally change the way people make phone calls. VoIP allows the transmission of the human voice simultaneously over the Internet in parallel with other data streams such as multimedia and fax. VoIP technology is reliable, cost effective, and allows for incredible clarity and quality. VoIP technology is the ideal solution for small and home office environments and is so cost effective that the return on the initial cost of equipment may be realized in a matter of months. Corinex develops and promotes products and services to allow the widespread use and adoption of VoIP technology.

What can a Corinex VoIP USB phone do for you?

With Corinex VoIP USB phone, users can make calls via the Internet to anywhere in the world. Installation is as easy as plugging the phone into a PC USB port without the need of drivers or additional memory. Corinex VoIP USB phone features real-time volume control, keypad dialing and customizable ring types with WAV files. This phone is fully compatible with NetMeeting, Hicall and other PC-based Softphone applications as well as API software. Simply plug the USB phone into a USB port, connect to the Internet and begin talking immediately, while saving money on long distance charges. The Softphone software, which is included

How is the Corinex VoIP USB phone used?
